

# REPRO-HANDBUCH PROCESS LENS MANUAL

## Rodagon-WA

Das Rodagon-WA ist ein modifiziertes Rodagon mit größerem Bildwinkel. Das bedeutet größere Formate bei gleichen Objekt-Bild-Abständen. Gerade für Kompaktkameras ein interessanter Gesichtspunkt. Es wird als Zusatzobjektiv zur Erweiterung des Maßstabsbereiches eingesetzt.

## Rodagon-WA

The Rodagon-WA a modified Rodagon with an increased angle of field and can thus cover larger image formats with the same object/image distance. That is particularly useful for compact process cameras. It used as an additional lens to extend the scale range.

*Rodagon-WA*
